**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP Hedenberg (US 5,947,009) in view of Kean (US 3,812,776). The patent to Hedenberg discloses the claimed subject matter (i.e. Fig. 5) except for an adjusting member or bolt screw-engaged with a screw hole. The patent to Kean discloses that it is known in the art to have provided an adjusting member (48 or 58) that is screw-engaged with a screw hole. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided a screw hole at the end of each tray of Hedenberg with an adjusting member in the manner suggested by Kean in order to maintain a predetermined gap between the stationary tray and the movable tray when the movable tray closes, if desired. It would have been an obvious matter of design choice to have the adjusting member "move" in a transverse direction towards a slit such that the movable tray member and the respective combing projections move towards the transverse direction, since applicant has not disclosed that such a design choice solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well.

***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new grounds of rejection.
